Title: -

Industrial Training on Python Programming

Company Profile: -

CodSoft is an IT services and product-based company that provides software development, training, and solutions in emerging technologies. It offers internships and learning opportunities for students to gain practical exposure and enhance their technical skills.

Training Details: -

I completed 4 weeks of industrial training at CodSoft from 25/07/2025 to 25/08/2025 in Python Programming. The training enhanced my coding, logic building, and project development skills through practical tasks.

Training Project Description: -

As part of training, I developed a 'Rock Paper Scissors' game in Python.

The project included user input, random computer choices, and conditional logic to declare results (Win/Lose/Draw).
